

# “BEAUTIFUL BERRIES” - TIPS AND COLOR GUIDE

There is no right or wrong way to render these beautiful berries, but following these tips may help you succeed in getting realistic results.

First, block in your darkest colors. Defining the details now will make sure they will not get lost and will help you establish the overall tone of the piece.

Next, lay down your mid-tones, leaving your brightest areas the color of the paper.

Study the patterns of the shadows and highlights as they wrap around each berry or seed. Understanding this will make the whole process easier, and is the key to having your art look more natural.

Now, go in with your lightest colors and blend as you layer. Using a blender pencil can also help fill in the tooth of the paper.

Last, go over all your areas again if you need to darken them. This will help you blend and define. Good luck and have fun!

## PRISMACOLOR PREMIER SUGGESTED COLORS

*(These colors are just suggestions, blend colors together to get the closest match.)*

### STRAWBERRIES

MAIN - A  
PC122 Permanent Red  
PC926 Carmine Red
