PC989
FC170

115 Chocolate
PC1082
FC283

144 White
PC938
FC101

GRIZAYE TIPS

If you elect to use an embossing technique, such as a slice or stylus tool, start by etching in areas you want to protect, such as the seeds or highlights. Define the darkest areas first to preserve the details. Next, layer in your mid-tones, and then go in with your lightest colors. A blender is useful to smooth transitions and to fill in the tooth of the paper. A white pencil on top of your colored pencils will brighten your colors and make highlights pop. Go over all areas to deepen your tones to create a professional look.
