136	Black PC935 FC199	144	White PC938 FC101

GRIZAYE TIPS

If you elect to use an embossing technique, such as a slice or stylus tool, start by carefully etching in areas you want to protect, like the whiskers and fur. Define the darkest areas first to preserving detail. Next, layer in your mid-tones, leaving your whitest areas the color of the paper. Then, go in with your lightest colors. Use a colorless blender to smooth transitions and to fill in the tooth of the paper. A white pencil on top of your colored pencils will brighten your colors and make highlights pop. Go over all areas to deepen your tones to create a professional look.
