GRIZAYE TIPS

If you elect to use an embossing technique, such as a slice or stylus tool, start by etching in areas you want to protect, such as the veins in the flowers or dimples on the book. Define the darkest areas first to preserve the details. Next, layer in your mid-tones, and then go in with your lightest colors. Use a colorless blender to smooth transitions and to fill in the tooth of the paper. A white pencil on top of your colored pencils will brighten your colors and make highlights pop. Go over all areas to deepen your tones to create a professional look.
